Schedule subject to change!!!

*Weekly readings and reading notes in the lab notebook are due Thursdays. In *Science*, read the News of the Week. In *Nature*, pick one Research Highlights or News in Focus/ Feature. Write the citations in your notes. Other readings are found in eCommons.

** Notebook labs are due on the day listed. "Labs" often seem informal, but notebooks are checked regularly and labs inform your writing and research practice as well as helping build your papers (and good research habits!).
