*Complex Variables and Applications, 9th edition*

By James Brown and Ruel Churchill

McGraw-Hill

 Course Description

Complex analysis is a jewel of classical mathematics. We will cover at least up to chapter 7 of the textbook, culminating in the application of residues to computation of integrals.

Homework, Quiz, Exams, and Course Grade

**Homework:** Homework assignments are given after every class and posted on this course web page. See below. They will not be graded.

**Quiz:** There will be half an hour quizzes on Wednesday classes during 2nd, 3rd, 4th week. These quizzes replace the midterm.

**Course grade** will be determined by the following (tentative) scale:

- Quizzes ~40% Final ~60%

This grade distribution is tentative. It will be adjusted at the end of the summer session II according to difficulty of quizzes and the final exam. All scores are available at the Canvas course site.

Exam Schedule

Final Exam: Wednesday August 30, in class, cumulative.
