

ENVS 190 Capstone Course: Environmental Problem Solving

Summer Session 2018

Mon. & Weds., 9-12:30, ISB 221

Instructor: Dr. Katie Monsen, kmonsens@ucsc.edu

NS2 Rm. 471 ✧ Office hours – Mon. 12:30-1:30 and by appointment

TA: Justin Luong, jluong4@ucsc.edu

This is a draft syllabus and subject to change.

Course Description

Official: “A synthetic course that draws on the knowledge and skills students bring from other courses in the major. Focuses on written and oral individual and group projects in which students must take the initiative. Emphasizes developing skills critical for students in their future careers.”

In other words: This course combines discussion, hands-on work in class, and minimal lecture to help you synthesize part of your learning from your tenure as an Environmental Studies student and prepare you for leaving UCSC. We will explore practical skills such as project funding and job searching, we will engage in discussion and critical analysis of problem solving in current environmental issues, and we will analyze our own and others' oral and written presentation of ideas.

Course Components

Note: all assignments must be completed for a passing grade in the course.

Participation:

Most class periods will be arranged with 2 hours of lecture, discussion, and in-class activities, followed by 1.5 hours of group project development. I expect you to prepare for class through engagement with the readings and assignments. You are also expected to participate fully in your small group and will evaluate your own and your group members' participation at the end of the course. Please speak with Katie or Justin early if you are experiencing any small group problems so we can work through them.

The evaluation of your participation will be based on attendance in class and your contribution to class discussion and activities and to your small group. Overall, participation is 15% of your final grade.

Written assignments:

You have five written assignments:

1. an assessment of your transferable skills, knowledges & preferences for job hunting (10%),
2. a resume and cover letter for a particular job (12.5%),
3. a created or modified LinkedIn account (5%),
4. a short grant proposal (12.5%), and
5. an individual STRIVE paper of 8-10 pages (25%).

The resume & cover letter, LinkedIn account, grant proposal, and STRIVE paper will go through drafts.

Your final submissions of those four assignments should include a) your rough draft with instructor comments, b) your final draft, and c) a cover letter describing how you addressed reviewer comments.

Oral assignments:

You have two oral assignments:

1. a project proposal presentation (5%), and
2. a final group presentation (15%).

Highly encouraged reading:

You are encouraged to acquire a copy of Bolles, R.N. *What Color Is Your Parachute?* Ten Speed Press. (Any recent edition is fine; it is updated every year).

I will post additional readings on Canvas, particularly relatively short articles for in-class discussion that you are expected to read prior to class. Keeping the readings condensed allows you to focus on your STRIVE paper.

Course Schedule

Date	Class content	Due date
July 30	Course intro, job hunting & inventory intro, knowledge & work environment inventory, project idea development	Brief description (written in class) of project and team assignments
Aug. 1	Work conditions & responsibilities inventory, review of research & writing skills, critically evaluating the quality of articles, project idea development, project proposal presentations & feedback	Project proposal presentation
Aug. 6	Geographical factors inventory, project idea development	
Aug. 8	Work responsibilities & writing resumes & cover letters, LinkedIn (meet at greenhouse)	First draft of STRIVE paper
Aug. 13	Grant writing, discussion of grant ideas, resume & cover letter feedback, project work	LinkedIn profile draft
Aug. 15	Discussion of interviews, grant proposal feedback, project work	Assessment of skills; draft of resume & cover letter
Aug. 20	Discussion TBA based on class interest (e.g., grad school, work at nonprofits), final paper feedback	Draft of grant proposal; second draft of STRIVE paper (as needed)
Aug. 22	Review of giving good presentations, final paper feedback, project work	Final resume & cover letter; final LinkedIn profile
Aug. 27	Course wrap-up, final presentations	Final grant proposal; final presentation (half of students)
Aug. 29	Final presentations	Final presentation (half of students) & STRIVE paper (everyone)

Course Expectations

Timeliness: Assignments are due at the beginning of class or section on the due date. Late assignments will receive a deduction of 10% per day (24 hrs or portion thereof). Please anticipate printer or other common problems and allow time for them.

Ethical conduct: Students are expected to adhere to the UCSC policy on academic integrity - http://www.ucsc.edu/academics/academic_integrity/ and associated links. All written assignments should be original works composed specifically for this course (with the exception of the resume & cover letter). All academic integrity violations (e.g. plagiarism, cheating, multiple submissions, facilitating dishonesty) will be prosecuted. Be sure that you know what constitutes plagiarism - <http://scwibles.ucsc.edu/Documents/Avoiding%20Plagiarism.pdf> has a good explanation.

Engagement: This class is an opportunity to be deeply engaged with your own development and the development of others as you finish your Environmental Studies majors. I expect you to address everyone with whom we interact (including each other) with respect, including by being on time and using laptops for course work while in class. Late arrival (more than 10 min.) will result in reduced participation scores.
