This online undergraduate course is suitable for majors in a wide range of disciplines such as sociology, geography, anthropology, environmental studies, politics, economics, and engineering. It will explore the many manifestations of water and sanitation justice and injustice on interlocking scales (i.e. local, national, transnational) while illustrating analytical ideas connecting to a range of social processes including claims for human rights, deprivation and exclusion, urbanization and infrastructure development, and privatization of land and water. Students will learn from various case studies in high-income and low-income countries and use key technical and social concepts to examine rights, equity, and justice with respect to water and sanitation. This unique course was developed by an interdisciplinary team of scholars with varying methodological (e.g. sociology, economics, politics) and place-based expertise. Each week was designed, and will be taught, by a different team member. Some weeks have multiple short readings that provide different dimensions of the theme (e.g. media articles) while other weeks have more academic papers. This diverse approach will acquaint you with practical and theoretical knowledge about water and sanitation justice.

Course Development Team

Dr. Ben Crow, University of California-Santa Cruz, https://bcrow.sites.ucsc.edu
Dr. Isha Ray, University of California-Berkeley, https://erg.berkeley.edu/people/ray-isha
Dr. Carolina Balazs, University of California-Berkeley, http://www.switzernetwork.org/users/carolina-balazs
Dr. Kirsten Rudestam, University of California-Santa Cruz, https://critical-sustainabilities.ucsc.edu
Abigail Brown, University of California-Santa Cruz, http://www.abigailbrown.me

Co-instructor: Dr. Kirsten Rudestam
Email: krudesta@ucsc.edu
Office Hours: by appointment at https://ucsc.zoom.us/j/6452103920

Co-instructor: Abigail Brown, PhD Student
Email: ablbrown@ucsc.edu
Office Hours: by appointment at https://ucsc.zoom.us/j/6791071197

The course will be located on Canvas: canvas.ucsc.edu. Please check Canvas to make appointments for instructor and teaching assistant office hours.

COURSE OVERVIEW

Please note: This course was initially developed for a ten-week quarter. We have reduced the readings to make the workload more feasible for a five-week summer course. We are not able, however, to edit the pre-recorded lectures. There may be times when faculty members refer to readings that are not mandatory for class. You are not responsible for these readings, but they are included as optional.

Week 1 - Module 1: Water/Sanitation Justice and Module 2: Governing Water
Week 2 - Module 3: Water Justice in the Global South/North and Module 4: Sanitation Justice
Week 3 - Module 5: Human Rights for Water/Sanitation and Module 6: Urban Water/Sanitation
Week 4 - Module 7: Climate Justice and Module 8: Irrigation and Water Justice
Week 5 - Module 9: Water, Sanitation and Poverty and Module 10: Moving Towards Justice
ASSIGNMENTS AND EVALUATION

Online Coursework

This online course is held using Canvas. It is a fast-paced and intensive course during the short summer session. Please allocate 30 hours each week to complete all components (e.g. readings, media, and assignments). You will be required to finish the Introduction module before starting course materials. It will be open a week before the course starts. It will provide more information about working on Canvas and details about weekly assignments. Please complete this module as soon as possible. Here is the Canvas student guide for more information: https://community.canvaslms.com/docs/DOC-10701. If you have problems using Canvas this quarter, please contact them directly at: canvas.help@ucsc.edu.

Course Components

Course content for each week includes lectures, videos, readings, a quiz, portfolio essays, and discussion forum posts. You will revise a portfolio essay for the final assignment. All materials are available on Canvas. You will be required to complete all items in a week before being allowed to progress in the course. You will need to complete the materials in a specific sequence outlined in the overview section at the beginning of each module.

Reading

All reading assignments are available on Canvas unless otherwise specified. This course is reading intensive. You need to complete assigned readings to participate in course components. We have created “Reading Guides” for particularly challenging articles. You will see these linked in Canvas. You can read these before finishing the readings to become more familiar with the author’s main points.

Grading

1. Weekly portfolio essays (500-800 words), peer review, final essay (three-five pages) – 40%
2. Weekly forum posts (200-250 words) – 30%
3. Weekly quizzes – 30%

* All late assignments will be penalized 5 points (half a letter grade) each day.

Weekly portfolio essays: Each week you will respond to a prompt related to that week’s readings. You will select a real-world case and apply concepts from the class. You may use the same case more than once, but please adhere to the specific instructions for each assignment. Each entry should be 500-800 words, double-spaced in Times 12-point font, and consistent with American Sociological Association (ASA) style. Each essay should include 3-5 references to sources you have used.

Weekly discussion forum posts: Each week you write on the online discussion forum. Every discussion will begin with a prompt connected to the week’s material. You should engage on the board by initiating posts and responding to the posts of others in ways that advance the conversation. You will be required to post at least two original posts. The first will address the prompt and should be 200-250 words. The second will respond to a classmate.

Quizzes: Each week you will complete a quiz on the week’s materials. Please start earlier in the week because you can take the quiz multiple times. Your highest score will be recorded.
Peer review: You will choose one essay from your previous submissions to expand upon for your final assignment. Please upload this original essay to Canvas, and then provide comments on three essays of your classmates. Your comments will help them improve their content for final revision.

Final portfolio essay: You will be asked to expand upon your peer review essay for the final assignment. You will need to increase the length to three-five pages and improve the content based upon comprehensive learning from the course and comments from classmates and instructors.

Technology Requirements

For this class you will need:

- A reliable computer
- A reliable internet connection
- A webcam and a microphone (built-in or peripheral)
- A modern web browser (Firefox, Safari, or Chrome)
- Word or similar word processing software

ACADEMIC HONESTY

You must avoid presenting other people’s work (e.g. on websites) as your own. This university takes a dim view of plagiarism. It leads to hassle, failing grades, reports, remedial work, and even suspension. We will be cross-checking writing assignments to ensure plagiarism is not occurring. This document gives information on how to avoid plagiarism: http://library.ucsc.edu/science/instruction/CitingSources.pdf.

ACCOMMODATIONS

UC Santa Cruz is committed to creating an academic environment that supports its diverse student body. If you are a student with a disability who requires accommodations to achieve equal access in this course, please submit your Accommodation Authorization Letter from the Disability Resource Center (DRC) to me privately during my office hours or by appointment, preferably within the first two weeks of the quarter. At this time, I would also like us to discuss ways we can ensure your full participation in the course. I encourage all students who may benefit from learning more about DRC services to contact DRC by phone at 831-459-2089 or by email at drc@ucsc.edu.

COURSE SCHEDULE – SESSION 2 (July 30 – August 31)

WEEK ONE*

*The Introduction Module must be completed before starting the first module.

1. Water and Sanitation Justice – July 30, 2018
   Lecturer: Dr. Ben Crow

Why do we want justice, equity or fairness? What do these words mean? How do they relate to water and sanitation? This week introduces various ideas of justice (e.g. environmental justice, food justice, climate justice, science and justice, and water justice). We will discuss how ideas of justice have been
used to understand water and sanitation inequalities. We will explore how water and sanitation injustice is associated with differences in wealth and health, power and dignity, gender and ethnicity.

- **Videos**: Global Water Scarcity, Contaminated Drinking Water in California’s Central Valley
- **Activities**: Introduction forum, portfolio essay, quiz

**Readings:**

**Optional Readings:**

2. **Governing Water** – August 2, 2018
   Lecturer: Kirsten Rudestam

Mainstream and grassroots approaches such as Integrated Water Resources Management (IWRM) and Environmental Justice (EJ), respectively, are strongly related to contemporary modes of water governance. We will utilize case studies to better understand these divergent management practices and ways of comprehending and working with water. We will also become familiar with some of the idioms that geographers, sociologists, and others have used to describe the movement of water through human-modified landscapes including the hydrosocial cycle, the network, and the waterscape.

- **Videos**: Environmental Justice in Everyday Life
- **Activities**: Forum post, quiz

**Readings:**

**Optional Readings:**

**WEEK TWO**

3. **Water Justice in the Global South and North** – August 6, 2018
Communities struggle to access clean water and adequate sanitation across the globe. We will explore these topics by looking at water justice issues across the global south (i.e. southeast Asia, Latin America) and global north (i.e. United States). We will pay attention to unique challenges in specific locales and consider commonalities and differences across geographic space. We will use a water justice framework to examine disparate locations and consider the utility and limitations of such frameworks.

- **Lectures**: 1: The Nature of Access and Injustice, 2: Sociopolitical Factors in Water Access, 3: Water Injustice in the Global South, 4: Water Injustice in the Global North, 5: The Drinking Water Disparities, 6: Bridging the South and North
- **Videos**: Periurban Pathways in Delhi
- **Activities**: Portfolio essay, quiz

**Readings:**

**Optional Readings:**

**4. Sanitation Justice and Injustice** – August 9, 2018

Lecturer: Dr. Isha Ray

Sanitation is also an issue of justice and injustice. It receives much less attention than water yet more people lack safely managed sanitation (4.5 billion) than water (2.1 billion). We will cover: why poor-quality sanitation is a public and environmental health concern; what the Sustainable Development Goals have to say about sanitation for all; low-cost sanitation technologies; gender equality and sanitation; sanitation workers and justice; and innovative ways ahead for encouraging households to accept and pay for sanitation, waste removal, and treatment.

- **Lectures**: 1: Sanitation, health, and justice, 2: Low-cost sanitation and financing, 3: Sanitation workers, 4: Innovative efforts in sanitation
- **Videos**: Gender equality: A view from the loo, What is sanitation?, Teacher-Facilitated Community-Led Total Sanitation, Iko Toilets, Meet Mr. Toilet
- **Activities**: Forum post, quiz

**Readings:**

Optional Readings:
• Jenkins, Mimi and Beth Scott. (2007). Behavioral indicators of household decision-making and demand for sanitation and potential gains from social marketing in Ghana. Social Science and Medicine, 64: 2427-2442.
• Bill and Melinda Gates Foundation. Strategy Overview of Reinvent-the-Toilet (check out the main page and a couple of winning examples).

WEEK THREE

5. Human Rights for Water and Sanitation – August 13, 2018
Lecturer: Abigail Brown

Human rights are a rallying call for people worldwide seeking better conditions. Yet do human rights to water and sanitation equal water and sanitation justice? Despite being previously assumed as embedded in other basic rights, water and sanitation were not officially acknowledged in international human rights conventions until 2010. This week outlines the evolution of the human rights to water and sanitation and critically examines linkages between human rights discourse and water and sanitation justice.

• Lectures: 1: Human Right(s) to Water and Sanitation, 2: Human Right to Water and Sanitation Struggles, 3: Critiques and Alternatives
• Videos: Thirsty for Justice, Rights versus Commons
• Activities: Portfolio essay, quiz

Readings:
• Short timeline on PBS Frontline World on Cochabamba, Bolivia.

Optional Readings:
• PAGES 6-13. “Water Justice City Profile: Cochabamba” by University College London.

6. Urban Water and Sanitation – August 16, 2018
Lecturer: Kirsten Rudestam

Built environments shape the way in which people relate to their local waters just as local waters inform the shaping of built environments. We will narrow our attention to one specific type of place this week - urban spaces. The plumbing of cities contributes to contemporary deprivations of access for inhabitants. We will examine the development of urban water and infrastructure over time and focus on different marginalized communities in this context with special attention to gender.

• Lectures: 1: Urban Water and Sanitation, 2: Modern Urban Water Systems, 3: Gender and
WEEK FOUR

7. Climate Justice – August 20, 2018
Lecturer: Abigail Brown

Climate change is an overarching concern of the twenty-first century. Humans, animals, and landscapes are impacted by climate change in unequal and unjust ways. Such inequalities are apparent when looking at climate change, water, and sanitation. We will evaluate linkages between environmental and climate justice movements and examine distributional and procedural aspects of climate justice through two case studies.

- Lectures: 1: Climate Change, Water, and Sanitation, 2: Climate Justice
- Audio: Navroz Dubash and Distributional Justice in Climate Change, Tracy Perkins and Procedural Justice in Climate Change
- Activities: Portfolio essay, quiz

Readings:

Optional Readings:
- EXECUTIVE SUMMARY Intergovernmental Panel on Climate Change and Working Group II. (2008). “Climate Change and Water.”

8. Irrigation and Water Justice – August 23, 2018
Irrigation is the single biggest reason for freshwater withdrawals around the world. This week provides an overview of irrigation and equity. We will cover: the need for irrigation around the world, projections of water demand for irrigation in the future, benefits and controversies around irrigation practices; the inherently political nature of water allocation; “Big Irrigation” and water justice; low cost irrigation options for smaller farmers; irrigation through multiple use systems; and irrigation through participation.

- **Lectures**: 1: Justice and “Big Water”, 2: Big Dams and Water Justice, 3: Is Participatory Irrigation Management More Just?
- **Videos**: Is the Three Gorges a Ticking Time Bomb?, The Miracle Water Village, Barbara van Koppen
- **Activities**: Forum post, quiz

**Readings:**
- Postel, Sandra. (2012). The power of a radically affordable irrigation pump. *National Geographic Voices*

**Optional Readings:**
- An entrepreneur creating chances at a better life. (September 26, 2011) *New York Times*

**WEEK FIVE**

9. **Water, Sanitation, and Poverty** – August 27, 2018
Lecturer: Dr. Ben Crow

There are substantial connections between getting water and using sanitation, the governance of water and sanitation, and the making of poverty, wealth, and inequality. The control of irrigation water, for example, may enable some to get rich. Or everyday access to sanitation and water may reproduce poverty, indignity, powerlessness and an allocation of homemaker’s time precluding more valued activities. This week will examine links between water utilization and poverty and possible solutions moving forward.

- **Lectures**: 1: Water, Sanitation, and Poverty, 2: Broader Sociological Dimensions, 3: Case Study of Water Law and First Nations
- **Videos**: Interview with Cammille Pannau, Conversation with Isha Ray and Ben Crow
- **Activities**: Peer Review, Quiz

**Readings:**
Optional Readings:

- “The Everywhere of Sanitation.”

10. Moving Toward Justice – August 30, 2018
   Panelists: Dr. Ben Crow, Dr. Isha Ray, Dr. Carolina Balazs, Kirsten Rudestam, Abigail Brown

We host a special panel discussion with the course creators to review concepts covered during the course, consider how water and sanitation justice might be advanced, and you will be able to present any lingering questions to them.

- Lectures: Panel with Course Creators
- Videos: None
- Activities: Final Essay

11. Finals Week

All portfolio essays need to be uploaded to Canvas. Please check Canvas for the deadline.
