### COURSE DESCRIPTION

This course gives students an understanding of digital painting, from basic techniques, to industry application, to how these programs operate. We will explore the elements of art and the principles of design and their application to this digital medium, all while practicing a variety of mark making techniques and unique digital painting features. We will apply and explore other applications of digital painting in industry and new media art. The studies and weekly homework assignments will encourage experimentation with the medium and help students practice and reinforce developing skills. With feedback through critique, students will be able to build upon their existing knowledge and expand into new territories. Students will build a cumulative professional digital portfolio of all of the studies and assignments completed throughout the course. This course satisfies an art major requirement, prerequisites for the summer course are waived, open to non-art majors.
