

# Syllabus

MATH 100  
Introduction to Proof and Problem Solving  
Summer 2022 • MWF: 4:30 – 7:00 PM

---

**Instructor:** Deewang Bhamidipati

(Please address me by my first name, which is pronounced *thee-waang*. Pronouns: he/him/his.)

**Lectures:** The lectures will be **synchronous** and will take place on Zoom (so will Office Hours). Lectures **will be recorded** and will be available for asynchronous viewing on Yuja via Canvas. You're highly encouraged to attend the lectures synchronously, or office hours if you can't attend lectures synchronously.

**Office Hour:** Wednesdays and Fridays 3:00 – 4:00 PM, or by appointment (This is when you come and talk to me if you have any questions, or otherwise. Do not hesitate to make appointments with me if regular office hours don't work for you!)

**Teaching Assistant:** Sylvia Bayard

**TA's Office Hours:** TBD

**Canvas:** I will be using Canvas primarily as a course repository. It will also be a place where you will receive course announcements, access the course schedule etc.

(Log in at <https://canvas.ucsc.edu> using your CruzID and Gold password.)

**Zoom:** I will be using Zoom to teach; links and more details will be available on Canvas.

**Ed Discussion:** We will be using Ed Discussion as a discussion forum for anything and everything course related. It will be checked frequently and unresolved questions will be answered. You're highly encouraged to collaborate with each other and answer each other's questions; engaging in such discussions amongst yourselves is an incredibly invaluable part of succeeding in this course. You can access it by navigating to it from the Canvas menu on the left on our Canvas course page.

**Gradescope:** Any assessment (see below) that needs to be turned in will have to be uploaded to Gradescope; links and more details will be available on Canvas.

## Learning Outcomes:

- You will be able to write clearly, concisely, and precisely; this is a writing-intensive course.
- You will understand the structure and importance of theorems, proofs and counterexamples.
- You will be able to abstract appropriately.
- You will be able to critique mathematical writing.
- You will develop your problem-solving skills.

**References:** Lectures will be self-contained, they will largely be based on the following books. You are **not** expected to buy copies of these books.

- ▷ *Mathematical Proofs (A Transition to Advanced Mathematics)* by Gary Chartrand, Albert D. Polimeni, Ping Zhang.
- ▷ *Book of Proof* by Richard Hammack (available digitally [HERE](#) for free!).

**Assessment & Weighing:** For the assessments listed below, we will be implementing **contract weighing**, essentially you will decide what weight works best for you for each assessment.

- In Week 1, you will be asked to fill a Canvas form (this is our contract) where you will indicate what weight you would like to give to each assessment.
- The weights you give need to add up to a 85%, as the weights for the Pre-class Reading and Post-class Reflection are non-negotiable, otherwise the default contract will apply (see below). Indicated in the third column are the minimum weights you should give to each assessment.
- Provided in the second column are also the default weights AKA the default contract.
- In Week 3, you will be given an option to renegotiate your contract i.e. revisit the weights you originally assigned and possibly change it.

This is a new system for all of us, so please reach out to me if you have any queries.

TITLE	DEFAULT	MINIMUM	DESCRIPTION
PROBLEM SETS	40%	20%	You will be asked to attempt two-three problems after almost every class, 8 in total. The specific days will be announced on Canvas.
PRE-CLASS READING	10%	N/A	Before each class you will read an assigned reading and attempt a short quiz primarily on definitions and some examples.
POST-CLASS REFLECTION	5%	N/A	You will be asked to reflect on the lecture and pre-class readings, and indicate what you got and did not get.
WRITING ASSIGNMENTS	20%	10%	You will submit two writing assignments, with one of the intent being practising and exhibiting proficiency with $\text{\LaTeX}$ . Further instructions and details will be available on Canvas. They will be due end of Weeks 2 and 4.
UNIT TEST A	12.5%	6%	This will be a three-hour test, which will have problems from the content from the first half of the course. Dates will be available on Canvas.
UNIT TEST B	12.5%	6%	This will be a three-hour test, which will have problems from the content from the latter half of the course. Dates will be available on Canvas.

**Grading Scale:** Passing grade is C or above.

<b>A+</b>	$\geq 95\%$	<b>B+</b>	80 – 84%	<b>C+</b>	65 – 69%	<b>D</b>	40 – 54%
<b>A</b>	85 – 94%	<b>B</b>	70 – 79%	<b>C</b>	55 – 64%	<b>F</b>	< 40%

**$\text{\LaTeX}$ :**  $\text{\LaTeX}$  (LAH-tekh or LAY-tekh) is the preferred choice among mathematicians for creating mathematical documents. You will need to learn basic  $\text{\LaTeX}$  for and during this course, especially

for the Writing Assignments. This will likely be done by looking at the .tex (tekx, the  $\LaTeX$  file extension) files that I provide you, mimicking the  $\LaTeX$  in them, and heading to [TeX Stack Exchange](#) for anything that is not included in them. Most of you will be able to pick up the basics very easily. You can start this journey by using [Overleaf](#), an online  $\LaTeX$  editors. **Please contact me if you need help getting started.**

**Course Schedule:** The following schedule is based on *Mathematical Proofs (A Transition to Advanced Mathematics)* by Gary Chartrand, Albert D. Polimeni, Ping Zhang.

Week of	Mon.	Wed.	Fri.
June 20, 22, 24	No Class	1.1 – 1.6	2.1 – 2.9
June 27, 29, July 1	2.10, 3.1 – 3.2	3.3, 4.1 – 4.2	4.2 – 4.5
July 4, 6, 8	No Class	5.1 – 5.4, <b>Test A</b>	5.4 – 5.5, 6.1
July 11, 13, 15	6.2, 6.4, 7.1, 7.3	7.1, 7.3, 8.1 – 8.2	8.3 – 8.6
July 18, 20, 22	9.1 – 9.6	10.1 – 10.3	<b>Test B</b>

**Guidelines:**

- PROBLEM SETS
  - ▷ Please turn in the problem set on the due date.
  - ▷ Discuss the problem set with your peers on Ed Discussion. (I insist on this.)
  - ▷ Pay close attention to the presentation and clarity of your reasoning in your answers.
  - ▷ Cite resources you have used while solving the problem set.
  - ▷ Name your peers with whom you have discussed the problem set.
- COMMUNICATION
  - ▷ Please contact me primarily via Canvas, especially if the topic is of a sensitive or personal nature. If your question is math-related, then please please ask your question on Ed Discussion directly or anonymously.
  - ▷ Please make sure you give me as much information as you possibly can about the subject you intend to discuss when you contact me.
  - ▷ You are more than welcome to contact me at any time, you will get a response from me promptly between 8 AM - 7 PM, Monday to Saturday.
  - ▷ You can send me an email (at bdeewang@ucsc.edu) if, and only if, your attempts at contacting me on Canvas have yielded no response from me.
  - ▷ **Never hesitate to reach out, I always want to hear from you.**

**practice, discuss, ask**

*practice* problems

*discuss* problems with your peers

*ask* me questions; more importantly: ask *follow-up* questions

SUBSEQUENT ADDENDUMS, IF ANY, TO ABOVE WILL BE MADE VIA CANVAS.  
I RESERVE THE RIGHT TO CHANGE ANY PARTICULAR OF THE SYLLABUS ABOVE.  
(ANY CHANGES WILL BE TO YOUR ADVANTAGE, AND YOU WILL BE INFORMED OF THEM PROMPTLY VIA CANVAS.)

### Summer Deadlines:

- (Session 1) Drop: **Monday, June 27**; Request for “W”: **Sunday, July 10**;
- (Session 2) Drop: **Monday, August 1**; Request for “W”: **Sunday, August 14**;
- (8-Week & 10-Week) Drop: **Monday, July 4**; Request for “W”: **Sunday, July 24**.

*You will not be dropped for non-attendance or non-payment, you must drop yourself. Dropping before the deadline results in a full-tuition reversal/refund. Withdraw posts a W for the grade and full tuition is charged (no refund).*

For all dates and deadlines, including ‘change of grade option’ (P/NP) and grades due, here is the summer academic calendar: <https://summer.ucsc.edu/studentlife>. For questions about dropping, requesting a W grade for a course, or withdrawing from the summer quarter, email [summer@ucsc.edu](mailto:summer@ucsc.edu).

**DRC Remote Accommodations:** The Disability Resources Center (DRC) reduces barriers to inclusion and full participation for students with disabilities by providing support to individually determine reasonable academic accommodations. Operations continue via remote appointments. If you have questions or concerns about exam accommodations or any other disability-related matter, email the DRC Schedulers at [drc@ucsc.edu](mailto:drc@ucsc.edu) for an appointment; you can also visit their website at <http://drc.ucsc.edu>.

**CAPS (Counseling and Psychological Services):** This is a stressful time, so if you are in distress, managing heightened stress and anxiety, or want to get more support and a counselor’s perspective on something you’re going through, CAPS provides a variety of services for your needs, please visit their website for more information <https://caps.ucsc.edu>.

**Title IX:** The university cherishes the free and open exchange of ideas and enlargement of knowledge. To maintain this freedom and openness requires objectivity, mutual trust, and confidence; it requires the absence of coercion, intimidation, or exploitation. The principal responsibility for maintaining these conditions must rest upon those members of the university community who exercise most authority and leadership: faculty, managers, and supervisors.

The university has therefore instituted a number of measures designed to protect its community from sex discrimination, sexual harassment, sexual violence, and other related prohibited conduct. [Information about the Title IX Office](#), the [online reporting link](#), applicable campus resources, reporting responsibilities, the [UC Policy on Sexual Violence and Sexual Harassment](#), and the UC Santa Cruz Procedures for Reporting and Responding to Reports of Sexual Violence and Sexual Harassment can be found at [titleix.ucsc.edu](http://titleix.ucsc.edu).

The Title IX Office is actively responding to reports and requests for consultation. If you are not currently working with someone in the office and want to make a report/request a consult, you can expect the fastest response by using our [online reporting link](#).

For more information please visit the [Title IX Operations under Covid-19](#) page.

**Report an Incident of Hate or Bias:** UC Santa Cruz is committed to maintaining an objective, civil, diverse and supportive community, free of coercion, bias, hate, intimidation, dehumanization or exploitation. The Hate/Bias Response Team is a group of administrators who support and guide students seeking assistance in determining how to handle a bias incident involving another student, a staff member, or a faculty member. To report an incident of hate or bias, please use the [Hate/Bias Reporting Form](#).

**Religious Accommodations:** UC Santa Cruz welcomes diversity of religious beliefs and practices, recognizing the contributions differing experiences and viewpoints can bring to the community. There may be times when an academic requirement conflicts with religious observances and practices. If that happens, students may request the reasonable accommodation for religious practices. The instructor will review the situation in an effort to provide a reasonable accommodation without penalty. You should first discuss the conflict and your requested accommodation with your instructor early in the term. You or your instructor may also seek assistance from the Dean of Students office.

**Small Group Tutoring:** Small Group Tutoring (SGT) supports students academically to advance educational equity by designing inclusive learning environments outside of the classroom. In SGT, you can expect the Tutor to facilitate cooperative group activities designed to have students work together on the course content and develop study skills for the course, please visit their website for more information <https://lss.ucsc.edu>.

**Academic Integrity:** Academic integrity is the cornerstone of a university education. Academic dishonesty diminishes the university as an institution and all members of the university community. It tarnishes the value of a UCSC degree. All members of the UCSC community have an explicit responsibility to foster an environment of trust, honesty, fairness, respect, and responsibility. All members of the university community are expected to present as their original work only that which is truly their own. All members of the community are expected to report observed instances of cheating, plagiarism, and other forms of academic dishonesty in order to ensure that the integrity of scholarship is valued and preserved at UCSC. For the full policy and disciplinary procedures on academic dishonesty, students and instructors should refer to the [Academic Integrity page](#) at the Division of Undergraduate Education.
